MONTEAGLE FUNDS

Supplement dated: August 28, 2025
to the Summary Prospectus, Prospectus and Statement of Additional Information
dated December 27, 2024, as supplemented

IMPORTANT NOTICE REGARDING CHANGE IN PRINCIPAL INVESTMENT STRATEGY

This Supplement to the Summary Prospectus, Prospectus and Statement of Additional Information for the Monteagle Select Value Fund, a series of the Monteagle Funds (the "Trust"), updates the Summary Prospectus, Prospectus and the Statement of Additional Information for the Monteagle Select Value Fund dated December 27, 2024, to amend certain information as described below.

On May 7, 2025, the Board of Trustees of the Monteagle Funds (the "Trust") upon the recommendation of Parkway Advisors, L.P., the Fund's investment subadvisor, and Park Place Capital Corporation, the Fund's investment adviser, approved the change to the Fund's principal investment strategy to be effective on or about October 28, 2025 (the "Effective Date"). The Fund will transition to the new principal investment strategy in an orderly manner. The Fund does not anticipate any material changes to the currently stated total annual fund operating expenses after the transition is completed.

THE MONTEAGLE SELECT VALUE FUND

PROSPECTUS

Accordingly, on the Effective Date, the Fund will revise its Principal Investment Strategy as described below.

1. ***As to the Section entitled "Principal Investment Strategies" on page 2 of the Summary Prospectus and Prospectus, its corresponding paragraph is deleted in its entirety and replaced with the following:***

The Fund uses a "value investing" style by investing, under normal circumstances, at least 80% of its assets in the common stock of domestic companies that the Fund's Sub-adviser believes are underpriced relative to comparable securities determined by price/earnings ratios, cash flows or other measures. The Sub-adviser relies on stock selection to achieve its results, rather than trying to time market fluctuations. In selecting stocks, the Sub-adviser establishes valuation parameters, by using relative ratios or target prices to evaluate companies on several levels. The Fund invests only in large capitalization companies included in the S&P 500® Index. The Fund seeks to maintain a minimum average weighted market capitalization of at least $5 billion.

2. ***As to the Section entitled "Principal Investment Risks" appearing on Page #2 of the Summary Prospectus and Prospectus, the following paragraph is deleted in its entirety:***

Strategy Risk: The Fund does not invest in Excluded Securities and may be riskier than other funds that invest in a broader array of securities and therefore the Fund may not achieve its desired results.

3. ***As to the Section entitled "Portfolio Managers" appearing on Page #4 of the Summary Prospectus and Prospectus, the following paragraph is amended in its entirety:***

Portfolio Managers

- Trevor Rupe, CIO, Chief Investment Officer of the Sub-Advisor, has managed the Fund since January 2023.
- Nicholas Chapman, Portfolio Manager of Parkway, has managed the Fund since 2024.

4. ***As to the Section entitled "Principal Investment Risks" appearing on Page #7 of the Prospectus, the following paragraph is deleted in its entirety:***

***Strategy Risk*.** The Fund does not invest in Excluded Securities and may be riskier than other funds that invest in a broader array of securities and therefore the Fund may not achieve its desired results. The Fund will divest itself of securities that are subsequently discovered to be Excluded Securities, therefore, Fund's return may be lower than if the Subadvisor made decisions based solely on investment considerations. If the Fund holds a security of a company that is determined to be an Excluded Security, it could result in the Fund selling the security at an inopportune time from a purely financial point of view. The process of screening out companies based on the Fund's criteria relies upon information or data from third parties that may be inaccurate or unavailable, which could cause the Fund to inadvertently hold securities that do not meet its criteria.

5. ***As to the Section entitled "ADDITIONAL INFORMATION ABOUT THE INVESTMENT OBJECTIVES, STRATEGIES AND RISKS" and its corresponding subsection entitled "Principal Investment Strategies" on page 10 of the Prospectus, is deleted in its entirety and replaced with the following:***

The Fund uses a "value investing" style by investing, under normal circumstances, at least 80% of its assets in the common stock of domestic companies that the Fund's Sub-adviser believes are underpriced relative to comparable securities determined by price/earnings ratios, cash flows or other measures. The Sub-adviser relies on stock selection to achieve its results, rather than trying to time market fluctuations. In selecting stocks, the Sub-adviser establishes valuation parameters, by using relative ratios or target prices to evaluate companies on several levels. The Fund invests only in large capitalization companies included in the S&P 500® Index. The Fund seeks to maintain a minimum average weighted market capitalization of at least $5 billion.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes that you invest $10,000 in the Fund for the time periods indicated and then redeem all your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
$150	$465	$803	$1,757

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 31% of the average value of its portfolio.

Principal Investment Strategies

The Fund uses a "value investing" style by investing, under normal circumstances, at least 80% of its assets in the common stock of domestic companies that the Fund's Sub-adviser believes are underpriced relative to comparable securities determined by price/earnings ratios, cash flows or other measures. The Sub-adviser relies on stock selection to achieve its results, rather than trying to time market fluctuations. In selecting stocks, the Sub-adviser establishes valuation parameters, by using relative ratios or target prices to evaluate companies on several levels. The Fund invests only in large capitalization companies included in the S&P 500® Index. The Fund seeks to maintain a minimum average weighted market capitalization of at least $5 billion. Once investments are identified for purchase, the Subadvisor will screen these investments using the eVALUEator ® screening software to exclude from the Fund's investments companies that produce, promote, advertise, sponsor, or offer services related to, abortion (or abortion products), pornography, human rights, gambling, and those entertainment companies that produce or support anti-family content in film, games, print, or television ("Excluded Securities").

Principal Investment Risks

An investment in the Fund is subject to investment risks, including the possible loss of some or all of the principal amount invested. There can be no assurance that the Fund will be successful in meeting its investment objective. Generally, the Fund will be subject to the following additional risks:

Investment Selection Risk. The Fund's ability to achieve its investment objective is dependent on the Sub-adviser's ability to identify profitable investment opportunities for the Fund.

Market Risk. The value of securities in the Fund's portfolio may decline due to daily fluctuations in the securities markets, including fluctuation in interest rates, national and international economic conditions and general equity market conditions.

Large Company Risk. The Fund invests in larger, more established companies, which may be unable to respond to new competitive challenges. Additionally, large companies may be unable to attain the high growth rates of successful, small companies, especially during extended periods of economic expansion.

Value Style Risk. The Fund invests in a style that emphasizes "value stocks". The market may not agree with the determination that a stock is undervalued, and the stock's price may not increase to what the Fund's investment adviser or Sub-adviser believes is its full value. It may even decrease in value.

Strategy Risk. The Fund does not invest in Excluded Securities and may be riskier than other funds that invest in a broader array of securities and therefore the Fund may not achieve its desired results.

Shareholder Concentration Risk. When a small number of shareholders account for a disproportionate share of the Fund's assets, the Fund could be vulnerable to a very large redemption request from a significant shareholder who wants to redeem. Such redemption may increase the expense ratio of the Fund. The decision-making process may also be controlled by a limited number of shareholders which may be biased in favor of said small group.

Active Trading Risk. High portfolio turnover rates that are associated with active trading may result in higher transaction costs, which can adversely affect the Fund's performance. Active trading tends to be more pronounced during periods of increased market volatility.

An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund is not a complete investment program.

Payments to Broker-Dealers and Other Financial Intermediaries.
